IV Insertion Rubric**

Criterion	Developing (1)	Proficient (2)	Competent (3)	Distinguished (4)	SCORE
<p>Identify patient using two identifiers and checked doctor's order.</p> <p>Prepared the patient.</p> <p>Washes hands.</p>	<p>Did not check identification of patient.</p> <p>Did not check doctor's order in computer/Epic.</p> <p>Did not explain procedure to the patient. Did not position the patient for procedure.</p> <p>Does not wash hands prior to procedure.</p>	<p>Identified patient with one form of identifying criteria (name band, date of birth). Checked physician's order and it was present in Computer/Epic. Explained procedure briefly to the patient and positioned the patient correctly.</p> <p>Washes hands prior to procedure.</p>	<p>Clearly identified patient using two identifiers, checked physician's order and gave relevant rationale for each choice.</p> <p>Positioned the patient appropriately for the procedure. Warned the patient before sticking them with needle.</p> <p>Washes hands prior to procedure.</p>	<p>Clearly identified patient using two identifiers, checked physician's order and gave relevant rationale for each choice.</p> <p>Gave a full, understandable explanation of procedure and positioned the patient appropriately.</p> <p>Washes hands prior to procedure.</p>	
Equipment	<p>Forgot more than 2 equipment items prior to beginning the procedure.</p> <p>Was not prepared to use the equipment, appeared uncomfortable.</p>	<p>Forgot 1-2 equipment items prior to beginning the procedure. Did not prepared prior to procedure. Appeared somewhat comfortable with using equipment.</p>	<p>Gathered all equipment prior to beginning procedure. Did not prepare equipment prior to procedure.</p>	<p>Gathered all needed equipment prior to beginning the procedure.</p> <p>Prepared the equipment prior to beginning the procedure. Appeared comfortable using the equipment.</p>	
Procedural Steps	<p>Missed several procedure steps. Did not use alcohol or Chloraprep to cleanse site.</p>	<p>Missed 1-2 steps in appropriate order. Used alcohol wipe with friction and Chloraprep on skin with limited use (less than 30 seconds). Reminded patient to scrub site again due to contamination of site.</p>	<p>All procedure steps followed but out of order. Used both alcohol and Chloraprep appropriately. Kept site from being contaminated during procedure.</p>	<p>Complete procedural steps properly followed. Used both alcohol and Chloraprep appropriately. Was diligent about protecting site from being contaminated</p>	
Safety	<p>Was unsafe in use of equipment.</p> <p>Did not use gloves during procedure or personal protective gear.</p> <p>Did not dispose of hazardous materials and/or left needle at bedside.</p> <p>Left tourniquet on patient.</p>	<p>Recognized safety of equipment but was inconsistent and needed reminders.</p> <p>Reminder was needed to remove tourniquet and place needle in sharps container. Left used supplies at bedside.</p>	<p>Used equipment in a safe manner throughout the procedure.</p> <p>Wore personal protective gear and disposed of needle properly.</p> <p>Removed tourniquet from patient. Left some used supplies at bedside.</p>	<p>Extremely safe when using equipment, retracted needle, placed in sharps container.</p> <p>Wore personal protective gear and put the patient at ease. Removed the tourniquet from patient and disposed of all used supplies.</p>	
Test	<p>Test incomplete or incorrect. Missing nursing note or incomplete nursing note on IV insertion is submitted.</p>	<p>Completes 3 of 5 test questions correctly and asks questions during class. Writes a nursing note using the example but is missing information.</p>	<p>Completes 4 of 5 test questions correctly and asks questions during class. Able to write a proficient nursing note on IV insertion.</p>	<p>Completes all test questions correctly or 5 of 5 questions. Writes a proficient nursing note on IV insertion.</p>
